Facial Reflexology NEWS

Mirror-image representation of action in the anterior parietal cortex and Facial Reflexology for Phantom pain.

By performing the rehabilitation with Facial therapy the somatosensory cortex is encouraged to normalize and the pain signals reduced.

## TEMPRANA REFLEX THERAPY

- Method of rehabilitation using Reflex Therapy as tool.
- Temprana Reflex Therapy rehabilitation for all kinds of brain injury, syndrome, mental dysfunctions, trauma, MS, Parkinsons, learning and behaviour problems, etc.
- A excellent and effective method for special needs and all ages.

MIKURADOG: Professional course ● Facial and paw reflexology for small animals.  
[www.mikuradog.com](http://www.mikuradog.com)

Mirror-image representation of action in the anterior parietal cortex and Facial Reflexology for Phantom pain.

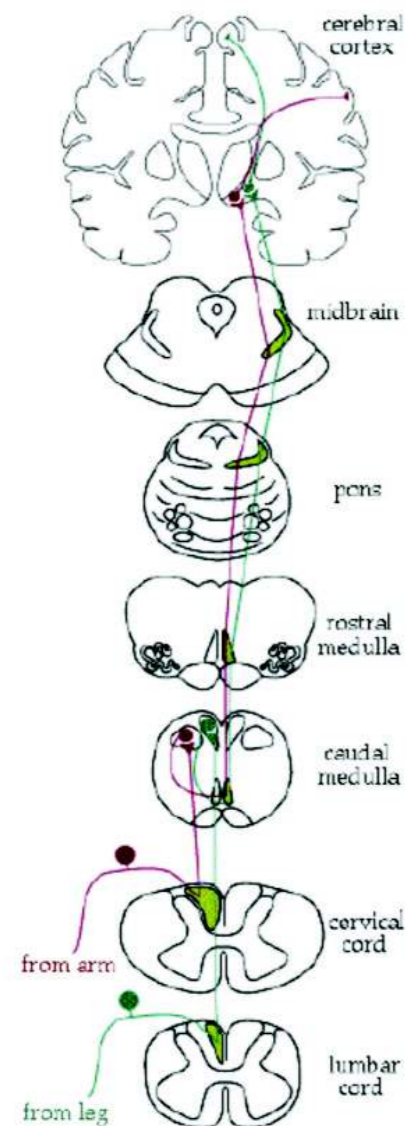

Mirror Theory. The Left Posterior Parietal Cortex Processes among Body Parts

The sensation of touch the body creates from the somatosensory cortex.

The brain has an in built map of the sensory system of the body called the somatosensory cortex.

This map of the body is feed information about touch, pressure and pain by sensory nerve fibres which connect to the somatosensory cortex via a system of junction boxes (synapses) that begin at the entry of the sensory nerve in the spinal cord and complete in the integration of the ending of the nerve pathway in the somatosensory in the cortex.

The Sensory Homonculus & Phantom Limb Pain

If a model of a man was made in proportion to how much attention was devoted in the somatosensory cortex to each part of the body the hands, for example, would appear to be 5 times their normal size.

Following an amputation the sensory map of the body becomes "upset" and this upset manifests its self in the experiences of phantom pain and phantom sensation.

Facial therapy as proposed by Lone Sorensen by utilizing methods normalizing the mirror function stimulating nerve points and cranial points placed on the face and scalp, related to the somatosensory cortex of the brain and the mirror image of the good limb to replace that of the missing limb to suppress the "upset" in the somatosensory cortex and thus reduce phantom pain and sensation.

Complex Regional Pain Syndrome & Neuropathic Pain

Facial therapy has also been shown to help and aid recovery from Complex Regional Pain Syndrome CRPS. In this condition it is now felt that part of the disease process occurs in the somatosensory cortex. When a limb becomes immobile it is thought that there is a disruption in sensory input to the somatosensory cortex which in turn begins to behave as it does in the phantom situation.

By performing the rehabilitation with Facial therapy the somatosensory cortex is encouraged to normalize and the pain signals reduced.

Patients recovering from surgery following trauma particularly involving the hand may find moving that hand difficult, part of this difficulty is thought to be due to the immobilization upsetting the somatosensory cortex. Recent work has shown that using Facial Therapy as part of the rehab program can facilitate recovery.

Additional treatment plan:

Face Reflexology

Cranial lines and points: Parietal (blue)

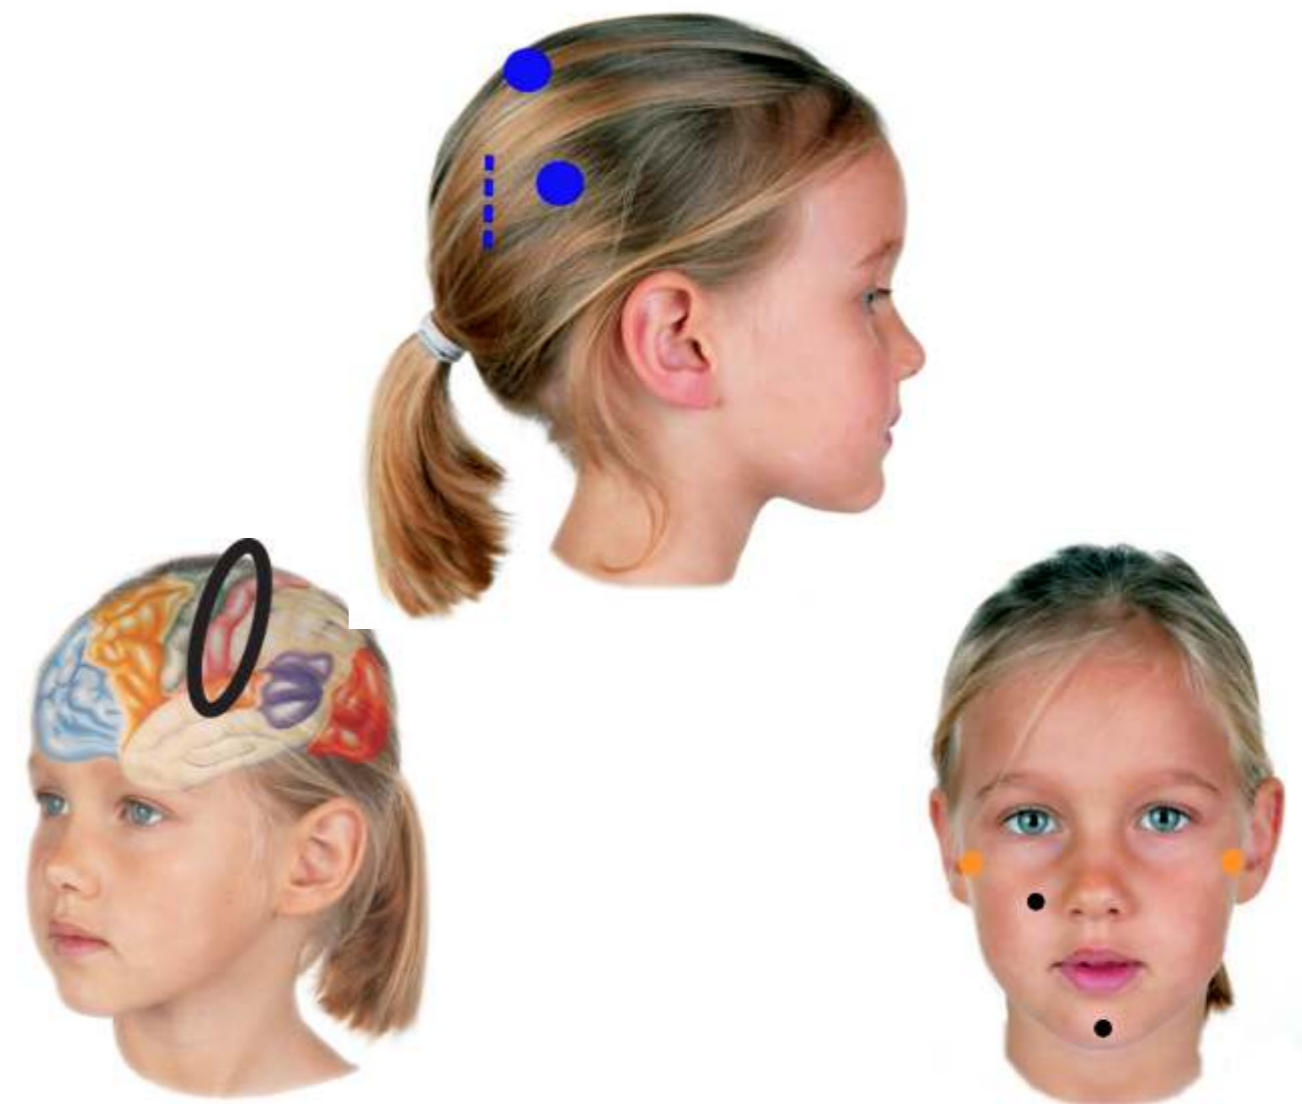

Nerve points: Parietal and for the missing limb; arm, finger, hand, leg, toe, foot, breast, etc.

Yamamoto: Missing limb

Neuro FOOT Reflexology

Partial lobe

Spinal nerve/ vertebra belonning to the missing limb

# Mari-louise Strandberg from Sweden wrote:

**Hi, everybody! In year 2004, 2 weeks after my first lesson in face-reflexology my husband went ill. He had a big stroke, and the doctors thought he would die! Immediately I started the treatments with face-reflexology, and he came home from the hospitale one week after the brain-surgery, only nine days after the terri...ble moment when the stroke hit him, he walked out from the hospitale. 3 days earlier he had a total hemiplegia in his left side. He was in that moment 42 years old. Now he is 47, and he has no problems at all because of the stroke! I have written a book about his stroke, and his healing, but it is only in swedish- the name of the book is - SOM PÅ RÄLS. Regards Mari-Louise.**

## Facial Reflexologist Kirsten Workman and Graham from England got this respons from a very happy patient.

After suffering from very heavy periods for many years, I decided to try a course of reflexology to try and relieve my monthly problem as an alternative to heading to the doctors for a potential treatment involving taking medication.

I approached Kirsten Workman MAR (Facial and Foot Reflexologist) and booked a home appointment. On her visit Kirsten carefully explained how reflexology worked, followed by a one hour facial reflexology treatment. I continued to have weekly one hour sessions and within 8 weeks there was a significant decrease in the amount of blood I lost during my period. Within 12 weeks I considered my periods to be normal and I was extremely pleased with the results. Due to my personal success with this treatment, I booked a course of treatments for my 14 year old daughter who like me experienced heavy periods and would bleed for up to 14 days each month. Again the treatment was successful and within a couple of months her periods were lighter and shorter.

Unfortunately due to financial reasons I had to stop having treatments and within months my periods became heavy again with me, I believe, haemorrhaging on my second/third day. Five weeks ago I started having reflexology treatments once again with Kirsten and I was delighted that when my period arrived last week, not only was the bleeding lighter but I never had the haemorrhaging experience on the second/third day.

Personally reflexology has worked not only for me but also for my teenage daughter and I encourage others to try it for themselves as an alternative to conventional medicine based remedies.

Dear Graham,  
I just wanted to thank you so much for the six facial reflexology treatments. As you know I find it almost impossible to relax, and felt a little better after each treatment and by the fourth, felt an immense improvement. `During the fifth and sixth session I was almost asleep, feeling totally rested when it was finished.  
On two occasions my headaches totally vanished, improving my wellbeing immensely. I look forward to my next treatment in January.

Best Wishes XXXX

*MS Patients*

---

Dear Graham  
I was very relaxed after the last session. Using the train and taxi is much better for me than driving after all those treatments I have. I felt like I was getting indigestion last night, but nothing happened, so that's an improvement. I didn't wake till 7am this morning which is great as I normally wake 6.  
XXXX

# International Training week 2010

## International Training week 2010

Training week, Playa de Aro 2010/ 19th -25th April.

Meeting point: Institute Lone Sorensen

Departure from Barcelona: 2.00 pm the 19th of April

Arrive back to Barcelona: 1.00 pm the 25th of April

Price for students 795 Euros each

Included apartment (2 students in 1 apartment or family in same apartment max 3 persons)

Included bus transport from Barcelona to Playa de Aro and back to Barcelona

Included Breakfast, lunch and dinner.

Included all workshops

Price for family/friends 550 Euros each

## Workshops:

- 1- How to correct posture of teeth with Facial Reflexology
- 2- Tibet neck treatment- an additional treatment who help pain in the whole body
- 3- Special facial treatment for thyroid problems
- 4- Children and ADHD
- 5- How to treat 5 types of depression with Facial Reflexology  
-and practice of Eye treatment

**Deposit:** 250 Euros

**Rest payment:** 545,00 Euro latest the 15th of Feb 2010

**Single apartment additional payment:** 200, 00 Euros

Children up to 2 years do not pay

Children from 3 to 12, ½ prices

**Payment to:** [www.lonesorensen.com](http://www.lonesorensen.com)

Or

**Bank:** BBVA

**ADRESSE:** GUIZPUSCOA 110, 08020 BARCELONA, SPAIN

*Travel the 9nd of Nov 2010 from Barcelona to Argentina*

*Back to Barcelona from Argentina the 28th of Nov 2010 (arriving day to Barcelona).*

*Buenos Aires, Cataratas de IGUAZU, Bariloche and Patagonia- La Gruta.*

*Incl. Flight from and to Barcelona/Argentina, hotel incl breakfast, national flights, bus and train, excursions and workshops.*

*Total 3490 Euro*

*Facial and footreflexology treatments available during the trip*

## **Conditions of payment**

*Value 3.480 Euros*

*Latest Reservation*

**1st of May 2010:** 1000 Euros

**1st of August** 1.000 Euros

**9nd of Octubre:** 1490 Euros

*Travel insurance is not included.*

***Included flight from/back to***

***Barcelona/***

***Argentina***

***Flight from Bs.As to Bariloche***

***Train from Bariloche to La Gruta***

***Flight from and back to Bs.As / Foz Iguazu.***

# TEMPRANA REFLEX THERAPY

- Method of rehabilitation using Reflex Therapy as tool.
- Temprana Reflex Therapy rehabilitation for all kinds of brain injury, syndrome, mental dysfunctions, trauma, MS, Parkinsons, learning and behaviour problems, etc.
- A excellent and effective method for special needs and all ages.

sorensensistem

www.temprana.org

This course is especially tailored for therapists; its goal is to give a better understanding of the therapeutic/functional action that is achieved through the stimulation of the Nervous system and the brain.

Any therapist, who treats a patient with some kind of brain and Nervous system dysfunction, be it motor, psychological or of any other ethnology must understand the function, its anatomy as well as its physiology.

The course main purpose is to teach the therapist how to treat a person with a brain dysfunction and to build a specific treatment plan for parents or family members. The main objective is to treat a child/adult intensively at home, as rehabilitation method using Neuro Face, foot and hand reflexology as tools.

**Do you wish to work with handicapped children or adults?  
Then this education is the right choice for you. We can offer a course concerning this exciting education in 5 modules of 5 days.**

The subjects taught during this course are:

- The functions and the anatomy of the human brain
- The physical, motor and psychological consequences of brain damage
- Parkinson's, dementia and other adults brain dysfunctions
- Children born with brain damage
- Acquired brain damage, Adult and children
- Epilepsy
- Post traumatic damage
- Syndromes
- Neurological syndromes
- Mental illnesses in children
- Autism
- ADD
- ADHD
- Dysfunctions of sensibility
- Learning and behaviour problems
- How to analyse step by step, creation of a work plan methodology.

The way to build up a treatment with:

Neuro-reflexology related to brain and CNS function:

Foot Neuro-reflexology

Facial Reflexology

Hand Neuro-reflexology.

Applied brain gym techniques from Bali, USA and Russian.

Body stimulation.

Homeopathic treatment for heavy metal poisoning and intoxications with diverse drugs. Supplements'

Nutrition for brain damage patients, syndromes, autism, learning-behaviour problems, etc.

*The basis of this education is theory and practice: Analysis, treatment planning, methodology, program for teaching parents.*

During this education you have to work with children and analyze different diseases and disabilities.

The education is taught in English by Lone Sorensen, International Institute of Facial Reflexology and Temprana Therapy.

**Learning Temprana reflex Therapy:**

The course is structured in five parts after which you take an examination and will be awarded a Diploma in Temprana reflex Therapy, Sorensensistem TM.

**1. January 27<sup>th</sup> - 31<sup>st</sup>, 2010.**

**9.30 am -05.00 pm**

The functions and the anatomy of the human brain

The physical, motor and psychological consequences of brain damage

Children born with brain damage

Acquired brain damage

Epilepsy

Post traumatic brain damage

**2. March 5<sup>th</sup> and 9<sup>th</sup> 2010**

Syndromes

Neurological syndromes

**3. May 26<sup>th</sup> - 30<sup>th</sup>, 2010**

Mental illnesses

Autism

ADD

ADHD

Dysfunctions of sensibility

**4. July 7<sup>th</sup> - 11<sup>th</sup> - , 2010**

Learning and behaviour problems

Dyslexia

Hyperactivity

Speech

Hearing

Concentration

**5. Sep. 22<sup>th</sup> - 28<sup>th</sup>, 2010**

**Teaching and treatment model for parents/ family member**

**Registration:**

**Registration deadline latest Dec.1st 2009**

**Registration fee: 300 euros by Dec.1st 2009.**

**Course FEE: 700 euros each module**
